

TOPIC: Open a food café**Situation:**

Open a food café for the public & serve them a hygiene & good food.

Plan:

The opening of food café will be in a next-week. Need a place, where public or crowd is large required.

Prepare:

Firstly, we can decorate the café so that the people like to see it. Then we can also decide the menu or select the items that we want to keep in menu. We have to find the chefs who know about every food item very well. We have to buy some designer plates to serve the food.

Process:

We have to use some techniques for whatever food is cooked. It should be ready immediately then we have to arrange the tables and chairs in systematic manner . when people eat food , we should take care of what kind of music is played so that they can enjoy both the food and the song.

Analyse:

We have to check before the opening of a café that everything is fine or not. We have check before serving the food that it does not contain anything that people may not like , we also have to check the sound system & in the end we will ask the customer feedback so we can know whether the food was good or not & what changes should be made.

Share:

We have to advance the café so that people know about the café. We have to invite someone who is famous in the area so through him many people will get to know about the café.

Act:

The opening should be done in a good way and we should serve them a good and hygiene food so that they like it come again.
